## Objectives

---

I am a Full-stack web developer adept at contributing to collaborative working environments, finding solutions, and determining customer satisfaction. Built web applications for desktop, tablet, and mobile users with the latest front-end technologies and tools meeting the highest standards, best practices, and speed. Designed and developed applications across multiple APIs, third-party integrations, and databases. With the practice of pioussness, honesty, and hard-working, I want to contribute to a company's growth and success.

## Programming Skills

---

- Expertise: Skillfully create web applications with HTML, CSS, ES6 and JavaScript, Use React.js, React-Router, Hooks, Context, React Chart, d3, Axios.js, Tailwind, Bootstrap, Material UI, Daisy UI, React Bootstrap Styled Component for responsiveness.
- Comfortable: Node.js, Express.js, MongoDB, WordPress, Shopify
- Familiar: React Native, Next.js, TypeScript, PHP, MySQL
- Tools: Use Git, bash, Chrome Dev Tool, NPM, yarn, VS Code, Sublime, Adobe Illustrator, Figma as productivitytools. GitHub, Firebase, Netlify, Heroku, JWT for development operations and authentication purposes.

## Projects

---

### Bike Parts [live](#) | [client code](#) | [server code](#)

A web app for manufacturer cycle & bike parts.

Full Stack complete web application with CRUD features, Authentication and Payment integration, made with React, Express.js, MongoDB, React-Router, React-Hook-form, Stripe, Tailwind, Daisy UI. Deployed at Firebase and Heroku.
